

Customer Testimonials

We take pride in delighting our customers...

RIS + PACS

"CARESTREAM PACS offers a consistent user interface and reading tools for both on-site and remote users. Providing Web-based access to advanced diagnostic tools is important for a facility like ours that requires reading services from remote radiologists."

—Dr. Roger Eng, MD, MPH,
Chinese Hospital's Chief of Radiology

"In the daily clinical routine, digital technology means optimized processes, quicker availability of information in the relevant departments and, last but not least, more safety for our patients."

—PD Dr. Peter Landwehr, Head of the Radiology Department in the Henriettenstiftung Diakonie Hospital

"Since initiating a new billing cycle with automatic data entry from the CARESTREAM RIS, our department's receivables have shown a 30% to 40% improvement. This has added up to hundreds of thousands of dollars in recovered income. Billing time has also dropped from more than two days to a day or less."

—Pam Moseley, Radiology Informatics Director,
Rochester General Hospital

"With PACS, the multi-site, comprehensive care of our patients will be made considerably easier both in our own clinic and in the clinical departments we manage."

—Dr. Hellmut Elgeti of the Röntgenpraxis Am Marstall

"The image quality and productivity of CARESTREAM CR and DR systems is exceptional and meets the high standards expected by our specialists, physicians and staff. We are so pleased with the systems' performance that we are now employing additional DR and CR platforms from Carestream Health at our second busiest facility."

—Frana Evans, Director of Radiology,
Springfield Clinic, Springfield, Ill.

CR Elite

"Carestream Health's CR Elite systems are very user-friendly. Our technologists felt comfortable using this equipment very quickly and were able to be extremely productive from the start. Radiologists also like the image quality, which was the most important consideration."

—Susan Redmond, Clinic Supervisor, Insight Medical Imaging Clinic in Spruce Grove, Alberta, Canada

DRX-1 = Wireless

"We have four DR systems from Carestream Health because these systems are versatile, highly productive and their image quality is unsurpassed. The company works closely with our staff to help us implement the DR system that best meets the requirements of each environment."

—Robert Whitmarsh, Manager of Medical Imaging,
St. Joseph Hospital Health Center, Syracuse, NY
